I strongly urge you to reject Petition 04-160 by the National Association of Broadcasters to limit "local content" on XM radio. Satellite radio is a revolutionary product and by limiting its ability to provide information is limiting this next evolution in radio. I am paying for the service; it is not for free. I feel that I should be able to obtain service that I desire, such as traffic and weather information, as well as a huge variety of music and news content, by paying for it. Services that I do not pay for (and choose not to listen to because of their limited content and advertising content) should not limit my ability to pay for someone to deliver to me via satellite, programming that I desire. Thank you for your consideration.
